## Coding Contest September 2023 Event Report

---

---

## Overview

Coding Contest Sept 2023 was a coding competition organized by LOL Coding Club on September 18th, 2023. The event was conducted for 3 divisions: Second, Third and Final year. Each division had 2 questions of appropriate difficulty. A total of 100 registrations were achieved in just 2 days, after which registration form was closed. 49 students of these reported at the venue and participated.

---

## Feedback

Feedback was received from Second year students that the questions were too easy. We did a survey before setting the questions and it revealed that most of the SY students don't even know arrays. Only 7-8 students found the set questions too easy. Perhaps a third more difficult question next time. Majority of students from all divisions found the questions to be of acceptable level.
